

Fiscal Estimate Narratives
COMM 1/22/2010

LRB Number	09-3439/1	Introduction Number	AB-0642	Estimate Type	Original
Description An income and franchise tax credit for a qualified equity investment in a qualified community development entity, providing an exemption from emergency rule procedures, and requiring the exercise of rule-making authority					

Assumptions Used in Arriving at Fiscal Estimate

Under the bill, the Department of Commerce would certify for the Wisconsin New Markets Tax Credit claimants who submit documentation from the Internal Revenue Service showing the following:

1. The claimant has made a qualified equity investment in a qualified community development entity (CDE),
2. The CDE's primary mission is serving, or providing investment capital for, low income communities or low income persons in the state, and
3. The claimant is eligible to receive new markets tax credit under federal law.

Commerce must verify the above information, and notify the Department of Revenue of the amount each claimant may claim, and of all certifications and revocations.

Commerce must also promulgate rules including the following:

1. Deadlines for submission of an application for certification.
2. The period of review of applications, which may not exceed 45 days.
3. Criteria for reviewing and prioritizing applications.

Commerce will not be able to accomplish these responsibilities within existing budget authority. The required rule promulgation, processing of tax credit applications, and verifications of all information contained in those applications will require 1.0 FTE position. This position will have the following costs:

Salary \$44,900
Fringe \$20,500
Supplies \$ 8,000

TOTAL \$73,400

Fiscal Estimate Narratives

DOR 1/21/2010

LRB Number	09-3439/1	Introduction Number	AB-0642	Estimate Type	Original
Description An income and franchise tax credit for a qualified equity investment in a qualified community development entity, providing an exemption from emergency rule procedures, and requiring the exercise of rule-making authority					

Assumptions Used in Arriving at Fiscal Estimate

Under federal law, the New Markets Tax Credit Program permits federal taxpayers to receive a credit against federal income taxes for making investments in qualified community development entities (QCDE). The credit may be taken over seven taxable years, and is equal to 5% of the investment in each of the first three years, and 6% of the investment in each of the subsequent four years. Federal law defines a QCDE as an entity with the primary mission of serving or providing investment capital for low-income communities or low-income persons that has been certified by the secretary of the Internal Revenue Service. Maximum investment amounts are allocated to the QCDEs by the Community Development Financial Institutions Fund (CDFI) of the US Treasury Department. To date, CDFI has allocated \$26 billion in equity investment authority. The last allocations were made in October, 2009. No further allocations will be made unless Congressional action is taken.

This bill creates a non-refundable Supplement to the Federal New Markets Tax Credit. The credit may be claimed against the individual income tax, corporate income and franchise tax, or the insurance premiums fees. The credit would be available to claimants who are currently eligible for the federal New Markets Tax Credit for investments made in the prior seven years, for the duration of their eligibility under the federal program. The bill authorizes the Department of Commerce (Commerce) to certify an individual who applies to Commerce, has made an investment in a QCDE, and is eligible to receive the federal New Markets Tax Credit to receive a credit against state income and franchise taxes and against license fees paid by insurers. Prior to certification, Commerce must verify that the person has made an investment in a QCDE with the primary mission of serving or providing investment capital for low-income communities or low-income persons in this state. Commerce must annually verify that the person continues to hold the investment in any year the person seeks to claim the credit. The credit may be claimed for up to seven consecutive taxable years beginning with the taxable year in which the taxpayer makes an investment in a QCDE. The amount of the credit that a taxpayer may claim is equal to the amount of the taxpayer's investment multiplied for the first three taxable years by 5%, and for the next four taxable years 6%, for a total credit of 39% of the investment amount for all years. Unused credit amounts may be carried forward and offset against tax for up to 15 years.

Fiscal Estimate

Based on information from CDFI, as of January, 2010, Wisconsin-based QCDEs had received a total of \$1.078 billion in investment allocations under the New Markets Tax Credit program within the last seven years, making them available for the state supplemental credit. Of that total, \$409 million has been committed to projects, leaving a total of \$669 million available for investing in projects in low-income communities. However, a QCDE can serve communities in multiple states, and it is unclear how many of these Wisconsin-based QCDEs primarily serve Wisconsin low-income communities. If all of the Wisconsin-based QCDEs serve primarily Wisconsin low-income communities and assuming that investments would be made under the remaining \$669 million in allocations in tax years 2010, 2011, and 2012, it is estimated that revenue would be reduced by these amounts:

FY 2010: \$8.7 million;
FY 2011: \$37.8 million;
FY 2012: \$49.1 million;
FY 2013: \$55.7 million;
FY 2014: \$49.8 million;
FY 2015: \$42.5 million;
FY 2016: \$41.7 million;
FY 2017: \$36.8 million;
FY 2018: \$23.4 million; and

FY 2019: \$10.0 million

The fiscal effect would be reduced to the extent that a portion of the \$1.078 billion is allocated to QCDEs that do not primarily serve Wisconsin low-income communities. Similarly, there are other QCDEs that are based outside of Wisconsin that are authorized to invest in Wisconsin. The fiscal effect would be increased to the extent that these QCDEs primarily serve low-income communities in Wisconsin, and investments in the out-of-state QCDEs are made by individuals or businesses with a Wisconsin tax liability against which to claim the credit. In addition, should more allocations be made available to CDFI, the fiscal effect would be increased to the extent that QCDEs that primarily serve Wisconsin low-income communities receive allocations. To the extent that claimants do not have sufficient tax liability to use the entire credit claimed in the year it is claimed and is carried forward, the fiscal effect would be reduced in near term and increased in later years.
